**A. E. MICHAEL,**  
A GOOD PLACE TO TRADE.

### Horticultural Show

A first class display of flowers was shown on Saturday last in Ducholke Hall, on the occasion of the first Flower Show, under the auspices of the local Women's Institute. Each the potted plants and the cut flowers, came in for some very favorable comment from those who attended, and the officers are to be congratulated on the success of the show.

Following are the prize-winners—

1. Potted plants
  - a—foliage plant. Mrs S. C. Elliot
  - b—plant in bloom. Mrs H. Oppertshausen Sr. 1st and 2d
  - c—hanging basket. Mrs G. Oppertshausen
2. Ferns, Mrs G. Oppertshausen 1. Mrs J. Malloch
- d—collection of house plants, not less than 2. Mrs John Miller 1, Mrs Jas Malloch
3. Cut Flowers—
  - a—Sweet peas, best collection, 3 of each variety. Mrs S. C. Elliot
  - b—Delicias. Mrs J. Lory 1, Mrs M. M. Kinly
  - c—Gladioli. Mrs J. Lory
  - d—Roses; not more than 8 varieties. Mrs G. Oppertshausen
  - e—Asters, any variety. Mrs G. Oppertshausen 1, Mrs S. C. Elliot
  - f—collection of cut flowers; not more than 42 varieties in separate compartments. Mrs M. McKinlay, Mrs Jas Malloch
  - g—Arrangement of cut flowers; to be judged by artistic arrangement. Mrs G. Oppertshausen 1, Mary Archibald

Dr. Schell's Dental Reducer  
gives instant relief to bunions and enlarged joints. Prevents rubbing and chafing. Preserves shape of shoe. Made of soft elastic rubber. Price 25c each.

**PAUL WERNER,**  
Graduate Fracturist.  
Opposite Royal Hotel.

### Wheat Pool.

It is quite possible that although there are a few men who are not members of the Wheat Pool and who grow wheat, they will have no place to market their wheat for the Pool is destined to control the marketing of the Western Canada crop from this time on.—Western Producer, Saskatoon.

### Open Seasons for Game.

Ducks, Geese—Sept. 12 to Dec. 14th.  
Plover, Snipe, Rails, Coos—Sept. 15 to Dec. 14.  
Prairie Chicken, Partridge—Oct. 1 to 31.  
Hungarian Partridge—North of N. Sask. River, 10 open season.  
Deer, Moose, Caribou—Nov. 1 to Dec. 14.  
Otter—Nov 1 to April 30.  
Muskrat—Between North Sask. River and T. 91—March 1st to April 30. South of North Sask. River, no open season.  
Mink, Fisher, Marten, Fox—Nov 1 to March 31.

### Standard of Rural Hotels to Be Raised.

Greatly improved conditions in the small town and village hotels of the province are likely to be brought about as a result of the survey of rural hosteleries which is now being made by officials of Liquor Control Board. The purpose is to raise the standard of service to the traveling public. Commercial travelers have made representations that some of the smaller hotels were not up to the mark, and it is probable that their efforts will be effective in having a betterment brought about.

There will be a general check-up of conditions with regard to sanitation, especially where there are no swimming facilities, and in the furnishings of the bedrooms of hotels.

When the reports of the inspector have been received, it is expected that there will be some sharp reprimands handed out, and unless a change in conditions takes place, there will be suspensions or cancellations of licenses.

### LOCAL NEWS.

Mr John Ambinister is on a visit this week to Vernon, B. C.

Mr and Mrs Fishenden are visiting friends in Vancouver.

Mr G. W. Graves, a former resident of Stony Plain but now of Hinton, B. C., is visiting here with Mr Mike Ducholke.

Mr Landy is in attendance this week at the convention in Winnipeg of the Canadian Bar Association.

Mr and Mrs Henry Miller Jr. of Detroit are visiting this week with Mr Miller's parents.

Mrs Carl Myer had recovered sufficiently to be taken home on Friday from an Edmonton hospital.

Miss Elsie Heichen has recovered from a minor operation performed last week, and has returned home.

The Ladies Aid of St. Matthews Church held its regular meeting Thursday evening at the home of Mrs Henry Ulmer.

Monday's train from Prince Rupert was 4 hrs. 30 mins. late.

Mr A. Hamilton, of Mullin, Leduc, was a visitor in town on Saturday.

Mr A. McElwith left yesterday on a business trip to Leduc.

Mr and Mrs E. J. Kibbles, who had been honeymooning at Jasper Park the past fortnight, arrived back in Stony this week, and have taken up their residence on Gofar Blvd.

Evangelists Reimer and Reider are now holding services in the German language at the Town Hall.

Much curiosity has been aroused among residents in the east end of town by the extensive bridge building operations now under way on the old C.N. grade. By some it is thought this will be the route of the new trolley line from the City to Stony.

Mr Philip Kornberger, who left here some two years ago to try his fortune in British Columbia, returned to Stony on Friday with his wife and family. The trip from Vernon was made by motor car, coming into the province at Banff, the journey taking four days. The car was fairly well laden, it carrying eight persons besides their belongings and bedding. The vehicle is now being overhauled, having run up a mileage of 2940 on the trip. Mr Kornberger and family are now ensconced in their old farmhouse at Blueberry and it is quite probable Mr K. will "stay put" for a considerable time before taking chances on another trip abroad.

Now that it is picking time, get your supply of cucumbers at Mr. Olenbach's place; fresh every day.

A supply of game licenses have been received at The Sun Office, where the 1925 game regulations may be seen.

Stop! Look! Listen!

Within the short space of less than the life of a generation the automobile has worked a complete revolution in modes of transportation and in the lives of people. But owing to the recklessness of so many drivers of cars it has become a veritable nightmare to locomotive engineers. To a greater extent than anything else it is the cause of nervous breakdowns among trainmen.

This is the age of speed, and thousands of motorists delight in tearing along roads and over railway crossings at top speed although there is no need for haste. They ignore the fact that there is more real pleasure to be derived from leisurely driving, and that a moment's stop at a level railway crossing to allow an approaching train to pass is not lost time. They scorn the risk they themselves run, and every year hundreds pay the full penalty of their folly, while other hundreds have cause to remember in pain and a permanently crippled condition the terrible price they are paying on account of their heedlessness.

But there is another side to the picture, and a locomotive engineer of the Pennsylvania Railroad has written an article, appearing in *The Outlook*, in which he describes just what the reckless motorist, who tries to "beat" an express train to the crossing, costs the engineer in nerve stability, and the consequent danger to every passenger on the train. This article is so illuminating and clearly that it is worthy of repetition. "The locomotive engineer in question writes:

"Come and take a ride with me in the cab of my engine. I am going to drive her at the rate of sixty miles an hour, which means that sometimes she will go considerably faster than that. There will be thrills. Perhaps I should tell you in advance of some of the things you will see—and feel.

"There are grade-crossings, you know. The crossings are not dangerous, but the automobile creates a danger at them. I do not recall many trips when I did not have from one to three close calls. At practically every grade crossing, without guard-gates some driver goes over the planks. That is, he has been rounded. And where there are guard-gates, they sometimes smash them down and go over just the same. Perhaps you will understand the nature of the thrills better if I give you one or two specific instances.

"On the fifteenth of last January I took my run out at 5.41 a.m. An hour later, I was driving along at reduced speed, probably forty miles an hour. I whistled long and loud for a particularly bad crossing. When within about 150 feet of the crossing I saw lights bobbing around on the planks. That indicated an automobile—in motion. My fireman, as I afterwards learned, was looking directly at the car. It did not occur to him at first that the driver would try to get across. Then he saw him give her the gas. Those bobbing lights, however, had enabled me to divine the driver's intention. I snapped the brake valve to full emergency position.

"We were three hundred feet past the crossing when the train stopped, but the emergency application of the brakes had stayed the engine the engine the instant that it took for the automobile to get over those rails. The fireman, in a tremulous voice asked me, 'Did he get over?' I answered, 'Yes, he did.' The fireman got up from his seat came over to the gangway at the right side, and, talking as though that driver might be getting every word, said, 'I'd follow, no one but God saved you.'

"From that instant for the balance of the trip there was an engineer in the cab whose nerves were not fit for his job. Little clicks and knocks were so magnified as to make it seem that the engine was falling to pieces. While crossing a foreign railroad at grade, and having the signal to proceed, one of the foreign railroad's engines started to blow off steam. I started involuntarily from my seat, and it was only with difficulty that I forced myself to remain in the cab.

"Another time before that, after I had sounded the whistle for the crossing, two automobiles got across, one right after the other, at about forty miles an hour. I was thinking how much better judgment those fellows would have displayed if they had stopped and waited only one minute for my train to pass when the fireman shouted to me, 'There's another!' Like a flash, a large coupe went across at about sixty miles an hour. In that coupe was a little girl about five years old on her knees looking out of the rear window. A woman, doubtless her mother, was at the wheel. To me, as looked at though the woman was not thinking of her child, but only of not being outdone by those other two cars—or by that train, either."

This engineer concludes by asking: "Were you ever held up at the point of a gun? I never was, possibly because I never had anything that the other fellow wanted, but I have heard men describe the situation. The hole in the gun-barrel looked as big as a washbasin, the bullets the size of cannon-balls. But that feeling, when contrasted with that of the engineer when he is about to strike an automobile, is about as placid as the waters of the Amazon compared with Niagara Falls."

"Possibly it is too much to expect a motorist, who risks his own life and the lives of his companions in a car, to give the slightest consideration to the locomotive engineer, or to the hundreds of passengers on the train whose safety depends upon the steady nerves of the engineer. But what grim tragedies would be prevented and suffering avoided if people would only realize that there is nothing "smash" in being a reckless fool.

## Canada May Benefit

Englishman Left Fortune For Charity In United Kingdom  
Nearly 300,000 pounds, sterling for charity has been bequeathed by Col. J. Barlow, a magnificent supporter, in his lifetime, of Bletley.

Col. Barlow made many visits to Canada in connection with rifle shooting. Canada may benefit under his will, as he left the residuary estate "to be applied, within 21 years of his decease, for such charitable purposes within the United Kingdom, Ireland, India, or any British state, colony, or dependency, as the trustees, in their wisdom, think fit."

The will adds that Col. Barlow desires that no money left by him shall be used for sectarian or political party purposes.

## Pain In The Muscles, Stiffness In Joints, Quickly Subdued By Nerviline

Those who have tested out numerous liniments will agree that where something is needed to dislodge a deep-seated, more or less chronic condition there is nothing to compare with Nerviline. It's because Nerviline penetrates so deeply, because it has about five times the strength of the ordinary oil preparation, it has come to be known as King over all Pains. For Rheumatic, muscular, and joint stiffness; Nerviline works wonders. A trial proves this. Get a 25 cent bottle from your dealer to-day.

## Building Great Cathedral

A further stage in the building of Liverpool Cathedral has just been entered upon, in the ceremony of "breaking of ground" for the foundations of the central space and tower, and of the western transepts.

When completed Liverpool Cathedral, which was begun in 1905, will be the second largest in the world. It is the only Anglican Cathedral in these islands to be built from the foundations since the reformation.

## THE ONE SURE WAY TO GOOD HEALTH

Is Keeping the Blood Pure By Using Dr. Williams' Pink Pills

Impure, weak blood is the cause of most of the troubles that afflict people. This is the cause of the wretched feeling of languor and faintness, pains in the back and side, headaches and breathlessness, that afflict women and make her daily life a torture. To get new health and strength the blood must be enriched. What Dr. Williams' Pink Pills do in cases of this kind is told by Mrs. Augusta Emery, Woolford Station, Alta., who says: "Living on the prairie, and knowing that there is nothing that women like myself miles away from a doctor, I want to tell them what Dr. Williams' Pink Pills have done for me. After my first baby was born I seemed to have little energy—I felt weary and nervous. I was unable to do the ordinary household duties. I felt I needed a tonic and as I had long since learned that there is nothing that I decided to try them. I got a supply and carefully followed the directions. The pills did long the result was wonderful. Day by day I regained my former strength and energy. The pills seemed to give me an appetite and I gained in weight and soon was able not only to do my work about the house, but to help with many chores on the farm. For this reason I would advise women, particularly those on the prairie or the farm, to keep a supply of these pills always on hand. One trial will convince you of their worth. I have recommended them to many of my friends and never have they failed to produce good results."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Bear Took Photograph**  
A camper, in one of the national parks in United States, had just set up a tripod to take some pictures of mountain scenery. A bear suddenly appeared and the amateur photographer started running down the mountain. When the plate was developed later, it was found that the bear in some way had dripped the shutter of the camera and had taken a good picture of the man running down the mountain side.

**Medicine Hat Gets Convention**  
Medicine Hat secured the 1926 convention of the Western Canada Irrigation Association when the matter was debated at the convention in session in Kelowna, B.C.

**Migard's Uniment for Dandruff**  
The W. N. U. 1591

## A Freak Lightning Bolt

Bolt Doing Damage In Truro, N.S., Came From Cloudless Sky  
From a cloudless sky a bolt of lightning, accompanied by a deafening thunder, descended upon Walker Street in Truro, N.S., shattered a tree, entered a house via the telephone wires, burned a telephone box, and left by an open door, in which a young child was standing.

The child was unhurt, but a pedestrian on Walker Street, was stunned and several others were shocked, while telegraph instruments a quarter of a mile away were put temporarily out of commission.

There was but one bolt of lightning and one clap of thunder and through it all the sun shone brilliantly and not a cloud was to be seen. A similar occurrence was recorded three years ago.

## Operated With Crude Outfit

Doctor In Alaska Used Jack-Knife and Denatured Alcohol

A tonal operation was performed recently at Berling River on Controller Bay, 60 miles east of Cordova, Alaska, by Dr. W. W. Connell, of Cordova, with a jack-knife and denatured alcohol. When Dr. Connell arrived at Berling River from a hunting trip he was called to handle the case. He had no implements. With the crude outfit he performed the operation with success. No anesthetic was administered. The alcohol was used to sterilize the knife.

**Its Quality Sells It.**—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving all kinds of neuralgic pains. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

## Free Insulin

New Government Policy to be Administered In Alberta

Free insulin supplies will be provided by the Alberta department of health in cases where the patients are not able to otherwise secure them. Hon. George Howland, minister of health, announces this as a new government policy to be administered through that department. The minister's statement to the matter was invited a short time ago by the editor of the *Hanna Herald*, who reported a number of cases in need of treatment but unable to meet the cost. It has now been decided to provide insulin for all such cases making application, and supplies will be sent out from the health department in Edmonton. Each application will be received and dealt with on its merits and necessary investigation as to medical diagnosis and financial circumstances, will be made before issuing the supplies. Alberta will in this way be adopting a similar course to that already taken by the province of Ontario.

## Eagles Travel By Aeroplanes

Two Birds Develop Ravenous Appetite On Unaccustomed Flight

A pair of golden eagles, presented to the Zoological Garden at Schoonbroek by King Ferdinand of Rumania were shipped to their destination in an aeroplane. This unique mode of transporting the two sovereigns of the air, was employed by orders of the Royal donor, who wished his gift to arrive as a surprise. The only effect this unaccustomed flight seemed to have had on the two birds was to give them a ravenous appetite.

**Minard's Liniment for Corns and Warts**

Walking machines, which can produce in a few hours the amount of wear on shoes that would actually take place in six months of use, are employed for testing the quality of shoes.

Gas for street lighting was first used in Baltimore.

# Genuine BAYER ASPIRIN

Say "Bayer" - Insist!

Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer product proved safe by millions and prescribed by physicians for 25 years.

**Safe** Accept only a Bayer package

which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer, manufacturer of Monoaceticester of Salicylic Acid.

## Tariff Experiment Fails

Irish Free State Will Likely Drop Most of Duties

The Dublin correspondent of the *London Westminster Gazette* says the tariff experiment started by the Irish Free State about two years ago has failed so signally that it is likely most of the duties will be dropped. The idea was, of course, to protect and foster Irish manufacturers, but the correspondent writes, foreign goods have not been excluded, while prices naturally have risen and the consumers paid the penalty.

He cites the motor car trade among those especially affected, saying the purchase of cars has diminished considerably, while all goods except tobacco and household furniture, have suffered and several Dublin firms have been unable to pay their way.

**Miller's Worm Powders** were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

## Plan Labor School

Efforts will be made to form a labor college for British Columbia during the sessions of a school of social science, which has been opened at Summerland, B.C. Men and women from all parts of the Canadian west, from as far east as Winnipeg, are scheduled to attend the meetings.

**Relief from Asthma.** Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes with its relief and the influence relieves the tightened, choking air tubes? It has made asthmatic asthma a thing of the past for thousands. It never fails. Good druggists everywhere have sold it for years.

**Farmer Anderson:** "So your boy's got home from college. Does he take any interest in the farm?" Farmer Gray: "He's beginning to. He's been showing me where we could have a fine golf course and how easy 'twould be to turn the barn into a garage."

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator for true relief. Its effects are sure and lasting.

## New Homestead Record

Setting the highest monthly record in nearly three years, 109 homesteads and 12 soldier grants—a total of 121 quarter sections—were filed upon at the Dominion land office at Edmonton the month of July.

Here the patented top of this fine kettle. No waste space above the water level. A very fine boiler, decidedly neat in appearance.

Well made, generously sized, properly designed, spot. Tip of spout well above water level to prevent overflowing or spilling.

Hinged lid at side of kettle for speedy filling under tap or by dipper; being unbalanced cannot fall off or get lost.

Handle, extra large rigid, shaped to fit the hand and always cool; being rigid you have perfect control at all times.

This kettle is made in S.M.P. Plant and is a Diamond Brand. It's also in nickel plated copper work. The name S.M.P. and our trade mark are on each genuine kettle.

# S.M.P. ENAMEL TEA KETTLE

## YOU Can Be a Professional Man

And Enjoy the Benefits of a Professional Life

Enroll now in our September class and graduate in Chiropractic. Before long you will become a successful practitioner, respected by all and enjoying the confidence of many houses. Full particulars are given in a booklet which will be sent free. Toronto College of Chiropractic, 2001, 2003 and 2005 College Street, Toronto.

## Another Century Will See Pacific Coast Importing All Of Its Lumber From Europe

One hundred years from now the people of the Pacific coast regions of North America will be importing lumber from Europe. So stated a recent forestry expert from Norway after an extensive journey through the timbered country of Oregon, Washington and British Columbia.

In view of the thousands of miles of stately standing timber on the Pacific coast today from California to Alaska, the foreign expert's words seem too ridiculous to even merit consideration. For here, upon a rugged coast-line, and reaching far into the interior, is such an abundance of trees, growth, close-standing and mighty, as to seem inexhaustible. No other land of earth has been so richly endowed by nature with such species as the fir, hemlock, spruce and cedar, as this Pacific coast.

Yet, despite this far-reaching, still-standing army of timber, immensely tall and thick of butt, so vast and over-increasing is the destruction caused by the logging industry that already there are a few far-sighted men nearly in agreement with the prophecy of the foreign authority. "Abundance, luxury, decline, desolation!" Those words of Daniel Webster rise up to sound a warning to the too optimistic people of a new land.

A tree which took a thousand years to grow can be felled and cut up into saw-log lengths in half a day of the logging industry, when horses and oxen were used to draw out the felled timber, no barn was done to the surrounding stand. Today, "high-lead" logging is coming more and more into use. By this system the enormous logs are lifted by donkey-engine power, and steel cables over two inches thick, carried through the air. And the dangling, moving logs, many tons in weight, smash down all growth before them. Seedling and sapling are crushed to earth. Trees fifty years in the growing are broken like matches. When a lumbering outfit makes work, the ground is a desert. Trees that would produce lumber in another half-century are turned into waiting fodder for the fire demon. Fortunes in pole, tie and pulp timber have been wasted. Not a seed tree even is left.

With these things in mind, the prophecy that "The Pacific coast areas will be importing lumber from Europe in a hundred years," seems less of a far-fetched statement.

### How English Dry Wet Hay

Farmers Enthusiastic Over Process That Works Successfully

In England, where rain falls so frequently that it is no easy matter for the farmer to "make hay while the sun shines," they have hit upon a plan that makes it possible to make hay and stack it in the midst of rainstorm without injury to the hay. Of course the wet grass cannot be put directly into the barn, which is what most American farmers do with hay properly sun-dried. The British farmer puts up a frame made of stout poles connected by wire, and from the base of the frame he runs a pipe out to the drying machine. The newly mown hay is stacked up about the frame in a circular shape. He then attaches it lightly and starts his machine, which draws hot air through the pipe to the bottom of the stack. The heated air rises through the grass, and in a day of eight hours no less than twelve tons of hay can be thoroughly dried. Furthermore, once the hay is made, it has thus dried retains more of its nutritive value than sun-dried hay. The drying machine can be driven by any gasoline engine, that of a farm tractor will serve. The engine operator is a fan that drives into the pipe air that has been heated by passing over cylinders that are kept hot by kerosene burners.

### Calgary's Population

Calgary's population in 1925, estimated by the Henderson's directory, following a census taken in the city, has been placed at 77,000, according to the 1925 issue which has just been published. Last year this same authority estimated the population at 76,328, showing an increase of approximately 1,500.

W. N. L. 1926

### Dehydration Best Method

Extensive Experiments Have Proved Process Is a Success

Dehydration is the drying of fruits and vegetables by artificially produced heat under carefully controlled conditions of temperature, humidity and air flow. That the process is a success has been proven by extensive experiments carried on at Ottawa, superior products being produced and the freshness and flavor better maintained than by any other method. In an address before the Pomological Society of Quebec, Miss E. W. Hamilton, Canadian specialist of the Dominion department of agriculture, gave the following as the advantages claimed for dehydration: That fruits which cooked more nearly resemble the natural in flavor and color than when treated by evaporation; that the fruits are protected from dust and bacteria; that the market is saved from a superabundance of fruit; that the product requires less space, is of much less weight than if fresh, can be shipped in far cheaper containers than canned or preserved fruits, and that dehydration makes possible the combination of drying, packing and all the steps in the process under the one roof. Miss Hamilton thought circumstances proved that dehydration would eventually take its rightful place as a valuable by-product branch of the fruit industry, if not a worthwhile industry of itself.

### Interesting To Sheep Raisers

Revision of Ram Premium of Dominion Livestock Branch Ready for Distribution

Farmers who keep sheep will be interested in the ram premium policy of the Dominion Livestock branch. This policy has been recently revised and a pamphlet containing the rules and regulations up-to-date may be obtained from the sheep division, livestock branch, department of agriculture, Ottawa. According to the new regulations ten or more farmers in a district, each keeping ten or more breeding ewes, and none of whom has previously kept a pure-bred ram, must agree to purchase pure-bred rams of the same breed. Two farmers each of whom keep less than ten ewes, may combine their flocks as a unit under the plan. Certain regulations, detailed in the pamphlet, such as dipping of flocks, docking of lambs, must be complied with. When this is done two annual payments of five dollars each will be paid by the livestock branch for each ram used, which will go a long way in making up the difference between the cost of a scrub ram and that of a good pure-bred ram. The increased value in wool and lambs easily makes up the balance.

### To Have Coast Office

Alberta Wheat Pool Plans to Export Most of Its Grain From Vancouver

Offices are to be maintained in Vancouver by the Alberta wheat pool. Since the pool contemplates exporting most of its grain through Vancouver there will be a tremendous amount of office routine to be carried out in connection with the pool's dealings with the terminal elevators, the railway companies and especially the shipping companies which convey the grain to the markets of the world.

It is understood that premises have already been selected and the personnel is on the way to take charge. The pool chartered its own cargo space and will have to maintain a fairly large staff to handle the various details of its activities in this port.

### Buffalo Remain in New Reserve

First dealer that any buffalo transported from Watnagait to the wood Bison reserve at La Bette, on the Slave River, are breaking away to the south bound for their old home at Watnagait, or that they are ever likely to be, was made by D. H. Christie, of the North West Territories and Yukon branch of the department of the interior, who supervised the whole movement of the 1,261 plains animals to northern regions recently.

Women are naturally foolish because they were made to match the men.

### Advices Canada To Get Boy Immigrants

200,000 Desirable Settlers Leave British Schools Yearly Says J. Obed Smith

In a recent interview, Colonel J. Obed Smith, former Canadian government official in London, stressed the importance of British boy immigration. This, Col. Smith said, had been realized by Australia but not appreciated in Canada. "In fact," said he, "Canada has lagged behind."

"Not less than 200,000 boys leave British schools every year, crowding the London market. These should form a new immigration field each year from which Canada could draw very many desirable settlers. Australia has proved the value of the young British generation to the full, but Canada has not done so. People inquire in public if Canada really wants immigrants, especially when the Empire Settlement Act of the Imperial Parliament provides financial assistance to an extent that has hardly a limit within the possibilities of use. No one can complain that the British people are not willing to assist their own to settle in Canada."

Col. Smith emphasized the fact that, if the scheme was to prove successful, the boys would have to be placed with good farmers, receive fair wages and the government would have to see that a portion of such wages was placed in the provincial savings bank, so that by the time the boy reached manhood years he should have sufficient money to make a start on a farm of his own.

### Big Game Being Massacred

Police Force Unable to Prevent Carnage in Transvaal

Sportsmen returning from the northern part of the Transvaal speak of the reckless slaughter of big game by hunters who seek supplies of blotto (sun dried meat). This wanton slaughter followed a recent proclamation allowing the shooting of the Wildbeeste or Gnu, a South African antelope having a head like a deer, an ass-like mane and horse-like tail. Apparently all sorts of big game are being turned into blotto and the wares return from the hunting grounds with full loads of game. The open country is described as unendurable, being fired all day long, and there are casualties in consequence. Meanwhile game is being absolutely massacred. Many animals are merely wounded and are left to die in agony. The police force is not large enough to prevent the carnage.

### Business Is Improving

Employment at the beginning of July showed a further increase in Canada of 23 per cent. This gain caused the index number to stand at 96.8 as compared with 94.5 in June and with 96.9 on July 1st, 1924. With the exception of logging, in which there was a seasonal decline, and trade, which showed no general change, all industries registered increased activity on the whole, according to the Dominion bureau of statistics.

## Pioneers Continue To Come From Many Nations To Take Up Homesteads On Prairies

### Lime In Feed

Feed and Drink Must Supply the Necessary Lime Compounds

One of the most important of the mineral constituents which enter into the tissue of the animal body is lime (calcium), says Dr. Shutt, Dominion chemist. Small traces of calcium compounds occur in muscle and the blood, bones and teeth are essentially phosphate and carbonate of lime. Cows need it in their pregnant state in order to supply their own needs and to build a strong skeletal structure in the developing calf. Special attention should be given to the phosphate of lime supply for ewes because of their two litters a year, their rapid growth and the general nature of their feed which too frequently is poor in lime compounds. The production of eggs and milk, Dr. Shutt points out, make large demands on the phosphate of lime content of the ration. Feed and drink must supply the necessary lime compounds. Hard water, no doubt, is one of the principal sources. Among the forages the legumes are particularly rich in lime, alfalfa heading the list, the feeding of which or other leguminous hay fodders practically obviates the necessity of supplementing the ration with special mineral-containing feeds. Meat and bone meal, bone meal, kankage and certain other packing-house by-products are rich in desirable mineral constituents. In the future the probability is the animals will be furnished, especially in winter, with a ration containing a large proportion of the milling by-products of wheat, oats, corn, etc., may require supplementing with calcium rich feeds, unless good clover or alfalfa hay can be liberally fed.

### Saskatchewan Butter Production

Increases 27.9 Per Cent. Or 638,591 Pounds In July

Saskatchewan's production of creamery butter in July jumped another 27.9 per cent, or 638,591 pounds, when the production for the month was 2,925,591 pounds, against 2,286,700 pounds in the corresponding month a year ago.

Production for the first seven months of this year totals 9,305,222 pounds, as compared with 7,355,579 pounds in the same period last year, or an increase of 1,909,743 pounds, 25.8 per cent. The central portion of the province is still making the proportionately greater increase in production month by month.

### "B.B." To Be Very Rare

Twenty-five years from now tuberculosis will be as uncommon as leprosy is today, says Dr. C. A. Saleeby, of the London Medical Institute.

English Hounds for Ontario Hunting Grounds

This consignment of twenty-one Foxhounds from the famous Mendly Hunt Pack at Pridley, Somerset, was brought to Canada in July by the Dominion Express Company for the Toronto Hunt Club. Commodious quarters were especially erected on the "Montrose" for the long canoe voyage and Hunsdon Morris, from the Toronto Hunt Club, who brought the animals across, stated that they suffered no ill-effects from the trip. This is the third batch of Foxhounds brought to this country by the Dominion Express within recent weeks.

Pioneering days are over, adequate transportation, good roads, nearby markets, easy having, allured away the necessity of "howling a home in the wilderness" and blasing a trail for others to follow, says the modern sage, but an incident that happened recently in the Edmonton, Alberta, land office not only disproves this fallacy but clearly illustrates that pioneering is still an attraction for many. The other day there walked into the Edmonton land office a man about 35 years of age, strong, upstanding and bronzed by a life of out-of-doors life, who made known his desire to tackle farming once again and took out papers on a second homestead in the Last Great West—the Peace River country. Applications on homesteads in this week are being accepted daily by the Federal Government, and the statement that a man filed on a second homestead would not appear unusual were it not for the fact that only those who filed on the land prior to June 2, 1894, are entitled to second entry.

When this farming pioneer came to Canada in 1884, a lad of 18 years of age, from a little farm in Cornwall, England, and settled on a homestead fifty miles from the nearest settlement—Fortage in Prairie, Manitoba—and before the Canadian Pacific Railway had commenced operations in the west, he had had to put up with all the hardships incidental to pioneer life. With the characteristic perseverance of the early settler, he cleared, broke and cultivated his land. The coming of the railway and settlement of the adjoining lands brought many improvements, both in farming and living conditions. His labors became less arduous and he raised his family in comfort and surroundings.

A few years ago by sold his Manitoba farm, intending to retire to a well-earned rest. However, when his sons took up homesteads in the Peace River country, he was unable to resist the pioneering spirit, so he once again filed on free land, not only to be near his sons, but also to help develop and settle the country which first gave him a start towards success.

This is the somewhat brief but significant story of one Englishman who came to Canada looking for a home and independence. His record of achievement in the west has been emulated by numerous fellow-countrymen, as well as by natives of many other countries. At the last census of homestead entries, it was found that, in addition to native-born Canadians, over 36 different nationalities had taken out homestead papers in the prairie provinces. Some of these pioneers came from such far lands as Iceland, China, Japan, Persia, Greece, India, Palestine and Mexico. There seems to be no limit from which Western Canada draws her settlers.

Within recent years the areas suitable for homesteads have become more and more restricted. At January 1, 1925, the Federal Government estimated that of the area surveyed in Manitoba, Saskatchewan and Alberta, nearly 55,000,000 acres were devoted to homesteads. The scarcity of free lands in close proximity to the railways, however, does not seem to be any drawback to the homesteader—2,764 entries were made in 1925—and the enhanced attractions of the fertile open prairie assure, for some time to come, a steady stream of that most valued class of settler—the pioneer.

### Procuring Caribou For Museum

New York Man Goes To B.C. For Special Specimens

Proceeding to the Caspian country of British Columbia for the purpose of getting special specimens of the Caribou caribou for the American Museum of Natural History, New York, Mr. and Mrs. James Lippitt Clark have sailed from Vancouver.

They intend going to Wrangell and from there to Telegraph Creek, head of navigation on the Yukon river, where they will outfit for two months in the Caspian. Mr. Clark, who is assistant director of the American Museum, has made several trips procuring specimens for that institution.

"Can you support my daughter in the style of a rich man?" asked a man. "No, but I can support her."

# BAREE, SON OF KAZAN

## James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.  
"BAREE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog.  
Is an Adaptation of This Story

## SYNOPSIS

Pierrot, the half-breed trapper, and Nepeese, his daughter, were hunting when they saw Baree. Baree was half-dog, half-wolf, but it was the wolf in him that Nepeese saw and loved, but her aim was bad. Baree had just seen Sekoosaw, the ermine, all but kill a porcupine, and he himself finished the bird and feasted upon it after he had frightened the ermine away. The dog was only a few weeks old and was having his first exciting adventures.

## CHAPTER V.—Continued.

"Uchi! Moosits!" gasped Nepeese, in her cry.  
Pierrot caught the rifle from her.  
"Diable! A dog—a puppy!" he cried.

He started on a run for Baree. But in their amazement they had lost a few seconds and Baree's dead senses were returning. He saw them clearly as they came across the open—a new kind of monster of the forests! With a final wail he darted back into the deep shadows of the forest. It was almost sunset, and he ran for the thick glow of the heavy spruce near the creek. He had shivered at the sight of the bear and the moose, but for the first time he now sensed the real meaning of danger. Almost it was close after him. He could hear the crashing of the two-legged beasts in pursuit; strange cries were almost at his heels; and then suddenly he plunged without warning into a hole.

It was a shock to have the earth go out from under his feet like that, but Baree did not yelp. The wolf was dominant in him again. It urged him to remain where he was, making no move, no sound—scarcely breathing. The voices were over him; the strange feet almost stumbled in the snow where he lay. Looking out of his dark hiding place, he could see one of his enemies. It was Nepeese, the Willow. She was standing so that a last glow of the day fell upon her face. Baree did not take his eyes from her. Above his pain there rose in him a strange and thrilling fascination. The girl put her two hands to her mouth, and in a voice that was soft and plaintive and amazingly comforting to his terrified little heart, cried:

"Uchimoo — Uchimoo — Uchimoo!"

And then he heard another voice; and this voice, too, was far less terrible than many wounds he had listened to in the forests.

"We cannot find him, Nepeese," the voice was saying. "He has crawled off to die. It is too bad. Come."

Where Baree had stood in the edge of the open, Pierrot turned and pointed to a birch sapling that had been cut clean off by the Willow's bullet. Nepeese understood. The sapling, no

larger than her thumb, had turned her shot a trifle and had saved Baree from instant death.

She turned again and called:

"Uchimoo — Uchimoo — Uchimoo!"

Her eyes were no longer filled with the thrill of slaughter.  
"He would not understand that," said Pierrot leading the way across the open. "He is wild-born of the wolves. Perhaps he was of Koomoo's lead-bitch, who ran away to hunt with the packs last winter."

"And he will die."

"Aytun—yes, he will die."  
But Baree had no idea of dying. He was too tough a youngster to be shocked to death by a bullet passing through the soft flesh of his fore-leg. That was what had happened. His leg was torn to the bone, but the bone itself was untouched. He waited until the moon had risen before he crawled out of his hole.

"Baree had not killed, but he had conquered."

In this humor Baree came, an hour later, out of the heavy timber of the creek-bottom into the wide open spaces of a small plain that ran along the foot of a ridge. It was in this plain that Oohoomisaw hunted. Oohoomisaw was a huge snow-owl. He was the patriarch among all the owls of Pierrot's trapping domain. He was so old that he was almost blind, and therefore he never hunted as other owls hunted. He did not hide himself in the black cover of spruce and balsam tops, or float softly through the night, ready in an instant to swoop down upon his prey. His eyesight was so poor that from a spruce top he could not have seen a rabbit at all, and he might have mistaken a fox for a mouse.

Even if Baree could have seen under the dark brush, and had discovered Oohoomisaw's ready to dart from his ambush. It is not likely that he would have gone very far afield. His own fighting blood was up. He, too, was ready for war.

Very indistinctly Oohoomisaw saw him at last, coming across the little open which he was watching. He squatted down. His feathers ruffled until he was like a ball. His almost night-lens eyes glowed like two shining pools of fire. Ten feet away, Baree stopped for a moment and flicked his wing. Oohoomisaw advanced cautiously. Again Baree advanced, passing within six feet of the bush. With a swift hop and a sudden thunder of his powerful wings the great owl was upon him.

In the stillness of night there rose a still greater thunder of wings, and for a few moments Baree closed his eyes to keep from being blinded by Oohoomisaw's furious blows. But he hung on grimly, and as his teeth met through the flesh of the old night pirate's leg, his angry snarl-carried defiance to Oohoomisaw's ears. Baree's good fortune had given him that grip on the leg, and Baree knew that triumph or defeat depended on his ability to hold it.

Suddenly Oohoomisaw ceased his beating and launched himself upward. Like huge fangs his powerful wings clutched the air, and Baree felt himself lifted suddenly from the earth. Still he held on—and in a moment both bird and beast fell back with a thud.

### INECTO RAPID

The world's best hair tint. Will restore gray hair to its natural color in 15 minutes. Small size \$3.50 by mail. Double size \$5.50 by mail.

The W. T. Pender Stores Limited  
Phone M. 2374-5 139 Yonge St.  
TORONTO, ONTARIO

Under those wings Baree's mind worked with the swift instinct of the killer. Suddenly he changed his hold, burying his fangs into the under part of Oohoomisaw's body. They sank into three inches of feathers. Swift as Baree had been, Oohoomisaw was equally swift to take advantage of his opportunity. In an instant he had swooped upward. There was a jerk, a rending of feathers from flesh—and Baree was alone on the field of battle. Baree had not killed, but he had conquered.

## CHAPTER VI.

Baree's fight with Oohoomisaw was good medicine for him. It not only gave him great confidence in himself, but it also cleared the fever of ugliness from his blood. He no longer snarled and snarled at things as he went on through the night.

He was still a wanderer—pupamoo, the Indians call it. It is this "wander spirit" that inspires for a time nearly every creature of the wild as soon as it is able to care for itself—nature's scheme, perhaps, for doing away with too close family relations and possibly dangerous interbreeding. Baree, like the young wolf seeking new hunting grounds, or the young fox discovering a new world, had no reason or method in his wandering. He was simply "travelling"—going on. He wanted something which he could not find. The wolf-note brought it to him.

The stars and the moon filled Baree with a yearning for this something. The distant sounds impinged upon him his great loneliness. And instinct

told him that only by questing could he find. It was not so much Kazan and Gray Wolf that he missed now—not so much motherhood and home as it was companionship.

Baree did not travel far that night. The fact that his wound had come with dusk, and his fight with Oohoomisaw still later, filled him with caution. Experience had taught him that the dark shadows and the black pits in the forest were possible ambushes of danger. He was no longer afraid, as he had once been, but he had had fighting enough for a time, and so he accepted circumspection as the better part of valor and held himself aloof from the perils of darkness. It was a strange instinct that made him seek his bed on the top of a huge rock up which he had some difficulty in climbing.

(To be continued)

### South African Native Ancient Human Type

Anatomists Greatly Interested in Find at Capetown

South Africa has yielded another cranial curiosity which is attracting attention among anatomists and antiquarians almost equal to that aroused by the discovery early this year of a fossilized skull at Taungs, Bechuanaland, described at the time as representing something midway between man and the great apes.

When the body of a native was dissected at the anatomical school of Capetown University, it was found to have a typical "boskop" skull, virtually identical with that discovered in the Transvaal in fossil form in 1915 and traced to the ice age of probably 35,000 years back.

Anatomists emphasize the interest and importance of the recurrence of a type of man hitherto unknown except in fossil remains.

"Why on earth do you come to me for a testimonial?" asked the governor of the prison.

"Because, sir," explained the applicant, "you are the only man who can say truthfully that you've known me for two years and never seen me under the influence of drink."

### Hello Daddy—don't forget my Wrigley's

Slip a package in your pocket when you go home to-night.

Give the youngsters this wholesome, best-tasting sweet-tooth pleasure and benefit.

Use it yourself after smoking or when work drags. It's a great little freshener.

## WRIGLEY'S

After every meal, Wrigley's Juicy Fruit Chewing Gum. Sealed Tight. Right.

Why They Are Upright.  
Stout people, they say, are rarely guilty of meanness or crime.  
Well, you see, it's no difficult for them to stoop to anything low.

### CHOLERA INFANTUM

Cholera Infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent the dreaded summer complaints. They are an absolute safe medicine, being guaranteed to contain neither opiates nor narcotics or other harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

In a recent race between an aeroplane and carrier pigeons from Miller Field, N.Y., to Washington, D.C., the plane beat the pigeons by two hours and forty-one minutes.

### BETTER IN EVERY WAY

After Taking Lydia E. Pinkham's Vegetable Compound

Ingomar, N. S.—"I took your medicine for a run-down condition and inward troubles. I had pains in my right side so bad at times that I could not walk any distance. I saw about Lydia E. Pinkham's Vegetable Compound in the newspapers and have taken five bottles of it. I am better in every way and you can use my letter to help other women."—Mrs. ALVITA M. PERRY, Ingomar, N. S.

### Nervous Breakdown Relieved

Toronto, Ontario.—"It is pretty hard to explain your feelings in nervous troubles. I felt low spirited, had pains in my head and eyes, always crying, and did not want to go anywhere. I do knitting and fancy work, and I would get terrible after a few minutes of work. I have been in Canada five years and have been this way ever since I came. I am taking Lydia E. Pinkham's Vegetable Compound and I sleep better and it seems to make me eat, and I must say I am feeling more jolly. I have great faith in your medicine because of what it has done for my husband's sister and she recommended it to me."—Mrs. A. BERRY, 10 Brough Avenue, Toronto, Ontario.

All druggists sell this dependable medicine, and women suffering from these troubles so common to their sex should give it a trial now.

W. N. U. 1091

## Sally Ann CLEANSER

### One Cent Demonstration Sale!

COUPON

I have purchased from (name of grocer)

(address)

two cans of Sally Ann Cleanser at the regular price of 15¢ each and one can at the special price of 1¢ each. I enclose additional 2¢ (3 cans for 26¢).

(Name)

(Street number)

Valid after September 8th. Each coupon entitled to one can only at sale price of 1¢.

A ONE CENT Demonstration Sale of Sally Ann—the marvelously efficient new Cleanser. Helps to lighten your household tasks; shows the way to simple, safe cleanliness.

3 CANS 26¢—the usual price is 2 cans 25¢. Just present the attached coupon and 1¢ to any grocer, with the regular price of two cans of Sally Ann, and he will give you three cans for the price of two, plus 1¢.

Cleans woodwork, painted walls, tiles, linoleum, porcelain, etc.

MADE IN CANADA

This 1¢ Demonstration Sale positively ends Saturday, September 8th, 6 p.m.

WESTERN CLEANSERS LTD. CALGARY, ALTA.

## NORTH COUNTRY RAILWAY NEEDS TO BE CONSIDERED

Calgary.—"There is a large productive territory in that north country, which includes not only the Peace River district proper but the district north of the Peace, whose traffic possibilities we cannot and will not ignore," said Sir Henry Thornton, president of the Canadian National Railways, in replying to a question regarding the Edmonton, Dunvegan and British Columbia Railway.

In connection with the negotiations now pending for the running of the line either by the Canadian Pacific or the Canadian National, Sir Henry stated another conference was to be called by the premier.

Asked "what foundation there was for the persistent rumors in the north that there is a possibility of the Canadian Pacific and the Government lines fusing," Sir Henry remarked this had been talked about, but there was nothing yet of a tangible character.

It is a very large and many-sided question and it should be viewed solely with respect to the welfare of the Dominion as a whole, he said.

He added that personally he was not in a position to express any opinion at all.

"The latest information is that you will remain in Canada," it was suggested.

"There has been no discussion at all with respect to the continuance of my work here," said the president, "and it is naturally a matter that is in the hands of the proper persons."

Asked "who the latter were, Sir Henry said he supposed that in the last analysis they were the people of Canada."

## Leaves Cares Of Office

Officialdom of Britain Off on Autumn Holiday

London.—If a rival power should open war on England tomorrow, the measures of defence would have to be organized by junior officials. The British Government has gone gross shooting, motoring and general holidaying.

King George and Queen Mary are visiting Princess Mary at Goldboro, Nova Scotia, where she is also accompanied by Field Marshal Earl Haig and other chiefs of the fighting services. The home secretary, Sir William Jowett, is giving the Communists a rest for a while while he shoots grouse, and the war minister has gone to the seaside to recuperate.

Most of the chiefs of the permanent staffs of the government offices are also taking holidays in the last half of August and middle of September.

## To Check Rum Running

Conference Between Officials of Dominion and U.S. Government

Washington.—Canadian representatives to attend the conference between officials of the Dominion and United States Governments to draw up regulations "to give effect to the recent treaty to suppress smuggling across the border, arrived here today."

The chief purpose so far as the United States is concerned, is to tighten the border restrictions against rum smuggling and narcotic smuggling, and for this reason Assistant Secretary of the Treasury Andrews, new head of the prohibition enforcement, will be prominent in making the regulations.

## Wage Board To Meet

Saskatchewan.—A meeting of the Saskatchewan wage board will be held in Regina in September, at a date not yet decided. John A. Mather, chairman of the board, announces Mr. Mather had not yet received any notice of business of unusual moment. He expected that routine matters would largely occupy the attention of the board.

A day of fog in London is estimated to have cost the county council tramways \$4,000.

W. N. U. 1591

## Ready To Argue Claims

British Columbia Has Completed New Case In Freight Rates

Victoria, B.C.—British Columbia has completed preparation of its new freight rates case, based on recent parliamentary legislation, it has been announced by Premier John Oliver, after G. G. McGeer, government counsel, had telegraphed to the railway board, urging an immediate ruling on an immediate argument on the province's claims for lower western grain rates.

"We are ready now to argue our claims any time," Mr. Oliver stated. "On account of the rate legislation passed by parliament at its recent session, we will hold the railway board actually has no alternative but to give us the same rates on westbound grain as those prevailing on eastbound grain. We assert we are entitled to Crow's Nest rates and want them to apply on the movement of this year's crop."

Edmonton.—A saving of about five cents per bushel to Peace River farmers and shippers will be effected if the railway commission gives an order making the Crow's Nest freight rates on grain applicable to the E. D. and B. C. and Central Canada Railways. Request to the board for such an order has been made by A. Chard, government freight supervisor, and it is expected the reduced scale will be effective in time for the movement of this season's crop.

## Worried Over Polish

German Trade War

Danzig Business Men Do Not Profit By Exemptions

Danzig.—The trades war between Poland and Germany now in progress may have one beneficial result in the opinion of many Danzig business men, if it will mean the defection of Upper Silesian coal to the countries bordering upon the Baltic Sea which were formerly a part of the Russian Empire. Such a defection would, in their opinion, prove an advantage to four interested groups; the Poles would have a promising new market in exchange for the German; Danzig would gain much new business as the shipping port; the Baltic countries could obtain the coal more cheaply than they can now buy English coal; Germany could dispose of her Ruhr coal without the interference of Upper Silesian coal competition.

The people of Danzig are the innocent victims of another phase of the rate war between Germany and Poland. Goods of purely Danzig origin may go to Germany un molested and in return foodstuffs and other articles intended purely for Danzig are permitted to come into the Free City exempt from duty.

As a matter of fact there are practically no "goods of purely Danzig origin," consequently exempting that class of merchandise affords little comfort to the Danzig business men.

## Miners Accept Terms

London.—A conference of delegates of the Miners' Federation decided to accept the terms of the truce in the coal industry on which the mine owners' notices for the termination of the 1924-25 wage scale were withdrawn, thus averting the recent threat of a strike. The conference instructed the executive of the federation to take such steps as might be necessary to present the miners' case before the proposed government commission of inquiry.

## Painleve Cabinet Doomed

Paris.—Premier Painleve's compromise cabinet was doomed when the Socialist Congress, representing 104 direct votes in the Chamber of Deputies, decided overwhelmingly against giving any support to the present cabinet.

The regulations of Leon Daud and Paul Painleve, declaring war on Painleve, were carried by 219 votes against 69, for a motion urging a benevolent attitude toward the present government.

## Low Water In Lake Ontario

Rochester, N.Y.—Concern has been caused here by the fact that Lake Ontario is smaller and shallower than it has been in the last quarter century. Government experts here declare that the Chicago drainage canal, completed last year, which diverts water from Lake Michigan through the city of Chicago and into the Mississippi Valley, for sanitary purposes, is responsible.

## FUNDING OF THE BELGIAN DEBT TO UNITED STATES

Brussels, Belgium.—Great reserve is shown by the Belgian press in commenting on the news from Washington of the agreement reached there for funding the Belgian debt to the United States.

Vingene Steels emphasizes the conditional character of the proposed arrangement and recalls the manner in which the American Senate refused to honor the signature of President Wilson to the peace treaty.

The paper questions whether Belgium is to be congratulated on the terms reached at Washington, even if the conditions as outlined in the dispatches received here are confirmed. London.—Official circles here were silent today regarding the settlement reached in Washington for funding Belgium's debt to the United States.

The impression was given, however, that the favorable nature of the terms was to be expected, and that unless close study revealed new angles at present unknown, the British Government would not depart from its present policy of refraining from pressing Belgium in connection with her financial obligations to this country.

## Criticizes Canada's Navy

Sarcastic Article Appears in Weekly Paper in London

London.—A writer in Truth, the weekly paper which frequently comments upon the paucity of Canada's contribution to the allied navy, says: "As The Toronto Globe recently was very much displeased with me for quoting the precise figures of the Dominion's contribution to the sea power of the empire, I think it right to tell the world that one-half of the active Canadian navy has now put to sea to cruise in company with the Capetown of the North American squadron. In other words, the destroyer Patriarch has left her moorings at Esquimaux and will not return until the beginning of October."

"What the other half of the active Canadian navy is doing I have no information at the present moment, but I believe she is assuring the safety of Halifax."

## Lost Their One Laundryman

Hawaiian Citizens Greatly Resented Arrest of Only Chinaman

Honolulu.—The laundry business in Waikiki, Island of Maui, Hawaii Territory, has been paralyzed, and irate calling a protest meeting, all on accusations, deprived of clean shirts, aprons, etc., have been on the verge of count of the Harrison narcotic law. Such was the story told by J. A. Manning, federal narcotic chief for Hawaii, on his return from Maui, where he arrested, among others, the town's only laundryman, Chong Wing.

"One hotel had no linen, and every one in the village seemed to have a dress or a shirt in the hands of Wing Chong Manning said. "To hear the grief and protests, you would have thought the pailon saint of the town had just expired."

## England Plans New Air Service

Passengers Would Be Landed At Airport On Thames

London.—A new development in air service between the continent and London is being planned for the near future. Experiments are being carried out with a view to the establishment of an airport on the River Thames at Hammer Smith, just below Putney, where French amphibious planes will alight and set down passengers on a specially constructed landing stage. The authorities stipulate that such landings shall occur before nine o'clock in the morning so that dislocation of river traffic may be avoided.

## Curtain Exploration For This Year

Washington.—The MacMillan Arctic expedition has abandoned hope of carrying out its full exploration programme over the Polar Sea this year. Curtailment of the expedition's activities was forced by adverse weather, which has locked the Northland in ice and fog, well ahead of the usual winter season.

## Return Russian Warships

French Government Decides to Hand Ships Over to Soviets

Paris.—The French Government has decided to hand over the Russian warships now at Brest, to the Soviets. The Soviets, in an agreement drawn up by Ambassador Krasin and Deputy Vincent Danilov, the French delegate, recognizes the Czarist debt of \$1,600,000,000 and give French capitalists a contract to reconstruct Russia in return for huge French credits.

The Soviets promise every one of the four million French Russian bondholders ten per cent. of his holdings in new Soviet bonds and ninety per cent. in bonds of new Franco-Russian companies, which will be formed to exploit mines, forests, factories and oil fields in Russia. However, it is understood that the whole debt has been reduced from gold to paper francs.

The Russian fleet at Brest, formerly held by General Wrangel who was defeated by the Soviets in the Crimea, consists of two dreadnaughts, two battleships, one destroyer, four submarines, one school ship and some auxiliaries.

## Predicts War Between States and Japan

British Author Says Conflict Will Start March 3, 1931

London.—Japan will declare war on America on March 3, 1931, by completely blocking the Panama Canal. Japan will then capture the Philippines after wiping out the American Asiatic fleet. A mighty Japanese air fleet including four giant ships will proceed to bomb and destroy San Francisco, Oakland, and Los Angeles.

After a tremendous loss of life, money and territory, the American fleet will win the war by annihilating the Japanese fleet in mid-ocean.

This prediction of conflict between America and Japan is made in a book, entitled "The Great Pacific War," by Hector Bywater, noted naval architect and strategist. The book, just published here, is causing keen interest in military and naval circles.

## Explorers Ordered To Leave Mongolia

Government Alleges Lack of Expedition Has Violated Agreement

Urgun, Mongolia.—The Mongolian Government has ordered the third Asiatic expedition of the American Museum of Natural History, under the leadership of Roy Andrews, to cease its exploration and scientific work and to leave Mongolian territory, alleging that Mr. Andrews has violated the terms of his agreement with Mongolian scientific organizations.

The Mongolian Government further alleges that besides carrying out his scientific work, the domain of paleontology, geology and zoology, Mr. Andrews' expedition has also engaged in topographical work and has employed a number of suspicious—in a military sense—persons.

Mr. Andrews also is accused of carrying on political propaganda and stirring up the Mongolians against the Red Bolsheviks.

## Shipping Flowers To England

Canadian Blooms Are a Surprise to English People

Ottawa, Ont.—Reports indicate that thousands of cut flower blooms are now being shipped to England from Canada. From Montreal, a landscape gardener has sent over 5,000 peony blooms, ablaze with a riot of colors, to England to grace the offices of the C.N.R. and C.P.R. at Westbury. In customary for flowers shipped from Canada to England to be kept in cold storage, arriving with the freshness of the Maple Leaf's fertility. English people are noted for their fondness of flowers, but the Canadian blooms have been a surprise. The Canadian peonies have proved to be far more flourishing blooms than the peony grown in the Old Country.

## Chicago Editor Dead

Chicago.—Victor F. Lawson, editor and publisher of the Chicago Daily News, is dead. Mr. Lawson, had suffered heart attacks in recent years from overwork, and an attack with acute dilation, proved fatal.

## PROPOSE UNITING VETERANS IN ONE ORGANIZATION

Toronto.—As the result of a province-wide conference of war veterans here, the veterans of Ontario achieved the most important forward step yet made in the direction of uniting all ex-service men under the banner of one great Canadian organization.

The gathering, made up of 159 accredited delegates from all parts of Ontario, met under the title of the Ontario Veterans' Unity Conference.

The outstanding business achieved was the unanimous carrying of a resolution favoring Dominion-wide unity of veterans; the appointment of a committee of seventeen representative veterans to represent all Ontario veterans at a Dominion unity convention of war veterans to be held at Ottawa not later than October 31, and the selection by the Ontario veterans of the name Canadian Legion of Veterans as the name of this new body in which all war veterans will join forces.

## Saskatchewan Lignite

Briquetting of Saskatchewan Lignite Technically Successful

Regina, Sask.—Carbonizing and briquetting tests on Saskatchewan lignite, which have recently been carried out in Germany, have proven technically successful, said W. C. Worcester, guest lecturer of ceramics engineering at the University of Saskatchewan, who was in charge of the tests and reported to the government upon his return to the city.

The tests have been carried out during the past two summers at two of the largest briquetting plants in Germany. These were Thyssen & Company, at Hultsch-Ruhr and the Lurgi Company at Frankfurt. Fifty-two tons of lignite from the mines of the Western Canadian colonies at Taylorton were used in the tests.

## Wheat Board Surplus

Saskatchewan's Share To Be Paid At Once

Ottawa.—Confirmation of the arrangement for the immediate payment of Saskatchewan's share of the wheat board surplus was made here by Hon. J. A. Robb, acting minister of finance. The sum in question, totalling approximately \$269,000, will be forwarded to the Saskatchewan Government in the course of the next two or three days, and remarks, it is understood, that proportion of the surplus due to that province, of those who had sent wheat to the board for sale and distribution, at the time the Canada wheat board gave its office in 1921. Payments of the respective shares due to Alberta, Ontario and Quebec have already been made, it is stated.

## Tourist Traffic Heavy

Over Two Hundred Cars Go Into Banff Daily

Edmonton.—Two hundred and twenty motor cars per day have been going into Banff this summer. The provincial highway branch has a statement from the superintendent of the Rocky Mountain Park showing that from June 1 to August 7 the traffic dues were collected at the east entrance to the park in the Calgary-Banff highway from 8,540 cars west-bound and 6,630 east-bound. This is a total of 15,170, for sixty-nine days, and the average is still keeping up.

## New Grain Inspector

Calgary.—George Hill, Dominion Government grain inspector in Calgary, has been offered and accepted the appointment of chairman of the grain appeal board authorized by the board of grain commissioners under new Grain Act.

Mr. Hill will commence his new duties on September 1. He will be located in Calgary.

## May Adopt Blue Sky Laws

Victoria, B.C.—If the inter-provincial conference in Winnipeg this week succeeds in clarifying federal and provincial jurisdiction, the Government of British Columbia will consider the advisability of putting new "blue sky" legislation in its books to protect investors from unscrupulous promoters. Attorney-General A. M. Manson announced today.

## Stony Plain Consolidated School District No. 52.

The school will be reopened on  
Tuesday, 1st September, at 9 a.m.  
Owing to lack of accommodation  
only a limited number of pupils will  
be received in the High School. Pre-  
ference will be given (1) to pupils  
whose parents are resident in this  
School District, and (2) to pupils from  
outside Districts who have already  
attended the school.

All intending pupils must enrol  
with the undersigned on or before  
FRIDAY, AUGUST 25TH. Pupils  
from outside Districts can only be  
admitted on receipt of a suitable un-  
derstanding for payment of fees.  
Forms of application for outside pu-  
pils may be obtained from the under-  
signed.

**JAS. MALLOCH,**  
Secretary.

**DEPARTMENT OF RAILWAYS  
AND CANALS.**  
WELLAND SHIP CANAL.  
Section 6.

Notice to Contractors.

**SEALED TENDERS**, addressed to  
the undersigned and marked  
"Tenders for Section 6, Welland Ship  
Canal," will be received at this office  
until 12 o'clock noon (Standard Time),  
Friday, September 22d, 1923.

Plans, specifications and form of  
contract to be entered into can be  
seen on and after this date at the  
office of the Chief Engineer of the De-  
partment of Railways and Canals,  
Ottawa, and at the office of the En-  
gineer in Charge, Welland Ship Canal,  
St. Catharines, Ont.

Copies of plans and specifications  
may be obtained from the Depart-  
ment on the payment of the sum of  
one hundred dollars. To bona fide  
tenders this amount will be refunded  
upon the return of the above in good  
condition.

An accepted bank cheque on a char-  
tered bank of Canada for the sum of  
\$450,000.00 made payable to the order  
of the Minister of Railways and Canals,  
or Bonds of the Dominion of Cana-  
da to the same amount or Bonds of the  
Dominion of Canada with an ac-  
cepted cheque if required to make up  
the difference, must accompany each  
tender, which sum will be forfeited if  
the party tendering declines entering  
into contract for the work at the  
rates stated in the offer submitted.

The cheque or bonds thus sent in  
will be returned to the respective  
Contractors whose tenders are not  
accepted.

By order,  
**J. W. PUGSLEY,**  
Secretary,  
Department of Railways and Canals,  
Ottawa, August 23d, 1923.

## On The Road To Nelson

(1) A Canadian Pacific Lake Steamship gliding between Nelson and Kaslo on the British Columbia lake district. (2) "The Canyon" near South Blaine on the Kootenay River. (3) Bennington Falls. (4) "The Pool" near Nelson on the Kootenay Lake, B.C.

On the road to Nelson, whether  
one enters from the east or  
west, new beauties charm the eye  
at every step. Murmuring plas-  
es and fir tree cast their shadows  
along sunny roads, while wayside  
flowers gladden the eye.  
Even in winter it is equally pic-  
turesque, when snow crystals adorn  
the trees and shrubs with flowery  
jewels, their shadows cast strange  
pictures across the soft snow cov-  
ering the sleeping earth. For win-  
ter in the mountains of British Col-

umbia is a season of joyous sport  
and out of door life!  
Along the way, as the Kootenay  
makes its downward dash to the  
Columbia, appear falls and rapids.  
Two of these are utilized for electric  
power, by the West Kootenay Power  
and Light Company, which distrib-  
utes power for three hundred miles,  
and the City of Nelson power com-  
pany, which provides its citizens  
with heat and light and power from  
this source. Beyond another of  
these rapids is the famous fishing

ground, known as Sloan pool, where  
fishermen from all over the world  
have tried their luck through dark  
and sunny days.

While the fishing may take time  
and patience, if the season or the  
bait is not just right, not so the  
scenery, for the beauty of the entire  
riverside may be seen from the car  
window when passing between Nel-  
son and Carleton Place, whence two  
routes are provided to the Pacific  
coast.

—Mrs. W. Garland Foster.

# DELCO-LIGHT

A New Model

A  $\frac{3}{4}$  kilowatt DELCO-LIGHT at a greatly reduced price is  
offered to you. This plant generates plenty of electricity for  
the average requirements of the farm home, for abundant electric  
light, power for pumping water and for running the machines  
ordinarily turned by hand.

And the price is only \$100.00, nearest Canadian Distributor's Headquarters.

There are larger DELCO-LIGHT  
models for larger requirements—at prices  
lower than those paid for former models of  
the same capacities. All DELCO-LIGHT  
models have the same unexcelled mechan-  
ical features. They are self-cranking,  
self-stopping, air-cooled, have only one  
place to oil, and are equipped with thick  
plate, long-lived battery.

No matter where you live, there is a  
satisfied user near you, enjoying the  
comforts, conveniences and labor-saving  
features of DELCO-LIGHT. Over  
125,000 plants in daily usage are your  
assurance of the continued satisfactory  
and economical service of all DELCO-  
LIGHT models. There is a size  
DELCO-LIGHT to meet your needs.

Write, phone or call for detailed information

### Stony Plain and District.

The Mission Festival at the Blueberry Church, which had been postponed on account of rainy weather, is billed for Sunday next, Sept. 6th.

Barth's Orchestra are giving a dance in Duchsolk's Hall Friday of next week, Sept. 4th.

Clarke's Drug Store will present a Souvenir Pen Knife given to those buying school supplies to the value of one dollar or more. School text books not included in this offer.

At Royal Alexandra Hospital, on Sunday August 16, to the wife of Mr J. M. Morris (of Rabbit Hills) a son (Norman Montgomery).

Shooters should remember the duck season does not open till Sept. 15.

Considerable damage is reported as being done by wild ducks on a number of the farms in this district to the standing grain and also to that in the stacks. Owing to the delay experienced in getting a permit to shoot the marauders by the farmers who suffer the loss, the demand is being heard that the date of the open season be changed back to the old date—Sept. 1st.

A very successful agricultural fair was held at Telfordville yesterday under the auspices of the U.F.A. local.

Local stock raisers have begun the shipment of their cattle already, three cars going out last week. The prediction is made there will be an unprecedented clearance of stock this fall as the continued low price has convinced the raisers there is no use in holding on further for the promised raise in the price of their products.

Twenty-five families of Germans are expected early in October to settle on a tract of land, all in one block, in High River district. It is said this is the forerunner of a lot of 50,000 German agriculturists who will shortly be on their way to Canada.

C. N. express money orders are now on sale at Clarke's Drug Store.

### Sporting Notes.

Capt. Heichen of the Football Club, this week received a communication from the manager of Edmonton Rivers—the team which played here Dominion Day—that they were willing to play Stony Plain team in Stony on Labor Day (Sept. 7) if suitable arrangements can be made. No effort will be spared to have the match pulled off here, as some good play is sure to be seen.

President Smith and Secretary Elliot of the Rifle Club have arranged a shoot for members at the Comet Range for Labor Day (Monday Sept. 7th). A splendid selection of prizes will be given, and every grade of shooter will have a chance to secure a prize. The prizes will be on view in the windows of the two local hardware stores.

### When School Begins.

Tomorrow (Friday) is the last day for intending pupils at the local school to enroll with Secretary Malloch, and pupils from outside districts will be required to give a suitable undertaking for the payment of the requisite fee.

Owing to lack of accommodation, only a limited number of pupils will be allowed to enter for the High School classes, and preference will be given pupils resident in the school district.

The staff at the local school will be: Ed J. Kibblewhite (principal), L. S. Robbins, Miss McNabb, Miss Simpson.

St. Matthew No. 1—E. J. Golz, Nov. 2—H. J. Boettcher.

Rosenthal—J. R. Levy.

Principal Brockie of Garden Valley School has been re-engaged for the fall term.

Mr. D. Moyer has been offered the teachership of Government School.

John Kulak has been re-engaged as teacher at Hay Lake school for another term.

Gloria Hills—Miss M. Laverty, senior room; Miss E. Reichert, primary.

Spruce Grove—Geo. E. Martin, principal; Miss Florence Pindelbeck.

Comet—Miss Hammen, of Olaton.

At Warden School Mr. Thomson has been re-engaged.

Golden Spike—Mr. Beckenridge re-hired, with Miss Miller of Edmonton, as assistant.

Brightbank School—P. Lawton re-engaged.

Spruce Grove, Rosenthal, Brightbank and several other schools in the country opened their doors on Monday.

### "In-and-Out" Methods.

Breeders who last fall, in the face of low prices and poor demand, went on as usual with their operations or made preparations to handle more stock than usual, are now realising on their foresight. High hog prices have prevailed for some months, and the demand for breeding a cask now very good, even the Market Examiner, while less than a year ago both purchased and grade stock were selling at auction prices. In the U.S. invariably, while cures in low prices are high, and vice versa, indicating that swine-breeders there dominantly follow the in-and-out system, going out too late and also getting in too late.

### Here and There

Since the first of April up to the present time approximately seven million pounds of various fish have been landed at North Sydney, N.S., by local fishermen. The catch made so far this season is far in excess of any previous year's catch in the history of this port.

All tourist and motorist records are being broken at Banff this year. There are three times as many campers as in any other year and 2,400 more bathers than in 1924. The Canadian Pacific hotel here and at Lake Louise reports bookings as being unusually heavy.

More Alberta provincial savings certificates were sold in the first six months of this year than in any full year previously, even including the big record year of 1920. Since the beginning of the current year up to the end of June, the total sales amounted to \$1,401,600. There is now close to \$7,000,000 outstanding in savings certificates.

Radio receiving licenses held in Canada at the end of last month numbered 56,003, according to a statement issued by the Federal Government. Ontario leads all provinces with a total of 28,307. Quebec occupied second place with 7,582 licenses, followed by Saskatchewan with 6,551; Manitoba, 4,442; British Columbia, 3,302; Alberta, 3,004; Nova Scotia, 1,435; New Brunswick, 755; Prince Edward Island, 87; Yukon, 22; and Northwest Territories, 5.

A consignment of 21 fox hounds from the famous Mendip Hunt Pack, in Somerset, England, was brought to Canada early in August by the Dominion Express Company for the Toronto Hunt Club. The English papers published photographs of these splendid animals and expressed gratification that good British hounds were being used on the hunting fields of Ontario. This is the third such consignment brought out by the Dominion Express within recent weeks.

The delegates to the Empire Press Conference at Australia who came from Britain and passed through Canada recently spent several days in the Canadian Pacific Rockies and enjoyed themselves trail-riding and hiking among the beauty spots that surround Banff and Lake Louise. Lord Burnham and several other distinguished British journalists established new walking records in covering the distance between Wapiti and Lake Louise in two hours, while it took the riders on ponies two hours and a quarter to cover the same ground.

Representing education authorities and the public, and secondary schools of Great Britain, about one hundred teachers from the United Kingdom arrived recently at Montreal on the "Empress of Scotland" and are now touring the country. Before their departure they received a congratulatory message from King George and on their arrival were welcomed by an official reception by representatives of the Quebec provincial government, prominent educationists and were entertained to dinner at the Chateau Frontenac by E. W. Beatty.

In a recently published monograph on "The Transportation of Canadian Wheat to the Sea" Miss L. M. Fair, M.A., makes the following comparison of Canadian and United States rates to show to what extent the resources of our railways are organized for the benefit of western producers:

To Port	Miles	Rate per U.S. bushel	Rate per cent
From—			
Winnipeg	420	50	12
Portland	9		
Portland	476	50	12
Calgary	525	50	12
Winnipeg	524	10	18
Regina	776	12	21
Medicine Hat	1,076	14	27
Lethbridge	1,197	15	28
Calgary	1,243	15	31
